ONE DAY WORKSHOP

A comprehensive, one day course with extensive hands-on training. Basic skin anatomy will be thoroughly covered. Participants will learn proper procedures and protocols for skin preparation prior to chemical peeling to decrease complications such as pigmentation, scarring and infection.

All major chemical classes commonly use in clinical and aesthetic medical procedures will be taught.

Chemical peels provide a solution to many skin conditions including scarring and anti-aging. The course will be administered in theory, demonstrations, case studies, and hands-on training
