CUPCURE

What is Facial Cupping?

Facial cupping is the application of a silicone cup to suction or vacuum to the skin for therapeutic and aesthetic purposes. It is an excellent form of non-invasive treatment that can work to minimize the effects of sun and environmental damage and aging. It is completely safe to use since it does not involve surgery, no recovery time, chemicals, or any other potentially harmful and painful procedure.

Course Description

This course will teach you the techniques required to provide you or your clients with a luxury facial Cupping. It is detailed step by step. You will cover cleansing, exfoliation, Scrubbing, Cupping, softening skin, extraction, massage, and mask treatments to achieve clear flawless skin.

It will include aesthetics beauty tools like Mini Derma Suction Machine, Facial Silicone Cups, Facial Kit & Mask.

This course educates from disposals to product training. It is a detailed step by step to immediately doing facial cupping with confidence after this course. You can start facial with confidence straight away.

This course enables you to start learning the practicals at your own pace, achieve a participation certificate on the completion at the end of this course.

This course is open to complete beginners or existing therapists who like to upgrade to learn facial Cupping. No previous experience required to attend. Everything is taught here to progress to an advanced level also.
